On the occasion of the Fall Conference

Chang-Ju Kim

The Fall Conference of the Korean Society of Exercise Rehabilitation will be held on Saturday, October 29, 2022 from 1:00 to 7:00 PM at the Marine Sports Education Center of Hanseo University Taean Campus. The theme of this conference is “Diversity of rehabilitation techniques.” For this topic, Emeritus Professor Chang-Soo Han of the Department of Robotic Engineering at Hanyang University and CEO of the Hexa Human Care, Professor Jae-Beom Hwang of the Lifelong Education Center at Eulji University and CEO of the Movement Clinic, Professor Yun-Jeong Park of the Department of Health and Human Performance at University of Houston, USA, Dr. So-Jeong Kim of the Sports Psychology at Dongduk University, and Professor Su-Yeon Noh of the Department of Exercise Rehabilitation at Gachon University, will give lectures.

At this conference, Emeritus Professor Chang-Soo Han will talk on “The future of wearable rehabilitation robots in preparation for the 4th industrial age,” and followed by Professor Jae-Beom Hwang’s about “Exercise rehabilitation approach for patients with low back pain.” Next, after the presentation of Professor Yun-Jeong Park’s “Exercise and cerebrovascular function: vascular hypothesis for Alzheimer’s disease,” Dr. So-Jeong Kim’s presentation of “The mediating effect of a growth mindset on the effects of introspective intelligence of life sports leaders on job stress” will be continued. And finally, Professor Su-Yeon Noh’s “Analysis of functional anatomical recovery mechanism of Pilates as exercise rehabilitation” will be presented. But besides these great presentations, there will be something else to enjoy at this conference.

As the saying goes, “The sky is high and the horse is fat,” the autumn sky in Korea is clear and high. Hanseo University Taean Campus has an airfield and yacht facilities, and it is a great place to drink a cup of coffee and enjoy the autumn scenery. The scenery here is nice and the air is clean, so it would be meaningful to take a break from the academic conference as an excuse. Therefore, we plan to have a marine activity experience to ride a yacht in the middle of the conference. It’s about taking time out of an academic conference and all of us riding a yacht. It will be a very different opportunity.

I would like to thank all the members who took a long time to come to this remote place. I hope that this conference will serve as a venue for academic discussion, while also providing a special opportunity to spend leisurely time under the high autumn sky.
